

HASAN ABDULHADI TURKI

SOFTWARE ENGINEER | PYTHON & WEB DEVELOPER

Baghdad, Iraq · +964 772 122 8887 · [hhtd.987@gmail.com]

Portfolio: [www.hasanturkidev.com]

GitHub: [https://github.com/hhtd987]

LinkedIn: [https://www.linkedin.com/in/hasan-turki-43a60a215]

PROFESSIONAL SUMMARY

Software Engineer and programming educator with a background spanning **Python application development, front-end web development, and network monitoring**. Experienced in building practical software projects with Python, Kivy, HTML5, CSS3, web scraping, and automation, with hands-on experience deploying and managing web projects. Combines software development practice with telecommunications and ISP operations experience, bringing strong troubleshooting, analytical thinking, and systems awareness to engineering problems. Experienced in teaching, mentoring and code review.

CORE TECHNICAL SKILLS

Languages: Python · HTML5 · CSS3.

Development: OOP · Problem Solving · File Handling · Regular Expressions · Pytest

Frameworks / GUI: Kivy · Tkinter · Pygame · Responsive Web Design

Web / Data: BeautifulSoup · Requests · Web Scraping · Data Extraction & Parsing.

Tools / Automation: Git · GitHub · n8n · VS Code · Hostinger · AI Integration · Prompt Engineering.

Systems / Networking: Network Monitoring · Troubleshooting · Technical Support · ISP Operations · System Administration

Additional: OpenCV · NumPy · Matplotlib · TensorFlow.

PROFESSIONAL EXPERIENCE

Programming Instructor / Course Educator

Independent / Programming Education · 2022–Present

- Designed and delivered structured programming courses covering Python, OOP, testing, problem solving, HTML/CSS, and practical software development.
- Taught Python application development, Git/GitHub workflows, debugging, and software-development fundamentals through practical projects.
- Created structured curricula and project-based exercises for web development and programming learners.
- Reviewed code and mentored learners on debugging, code organization, problem solving, and development practices.

NMC / ISP Monitoring Engineer – Technical Operations

EarthLink Telecommunications · 2019–Present

- Monitored ISP and telecommunications infrastructure to identify network incidents, service degradation, and operational issues.
- Investigated technical faults using structured troubleshooting and root-cause analysis techniques.
- Supported service continuity through incident analysis, escalation, and coordination with technical teams.
- Analyzed network events and operational data to distinguish infrastructure issues from customer/service-level problems.

Technical / Administrative Engineer

Ministry of Construction and Housing · 2019–Present

- Supported digital and technical workflows within a government engineering environment.
- Applied technical problem solving and systems-management skills to improve day-to-day operational processes.

KEY SOFTWARE ENGINEERING PROJECTS

Document Management System — نظام إدارة الوثائق

Python · Kivy · Local Database · File Management

- Developed a desktop document-management interface for organizing, managing, and retrieving locally stored documents.
- Implemented GUI and file-handling workflows around practical document-management requirements.

Automated Web Scraping Engine

Python · BeautifulSoup · Requests · Selenium

- Developed automated tools to collect and parse recruitment and job-market data from platforms such as Bayt.
- Built extraction workflows that transform online information into structured datasets and reduce repetitive manual collection.

Web Applications & Interactive Forms

HTML5 · CSS3 · JavaScript · Supabase · Hostinger

- Built responsive front-end projects and interactive forms with clean structure and practical UI patterns.
- Connected web forms to Supabase and deployed projects through Hostinger.

Personal Developer Portfolio & Educational Content

HTML5 · CSS3 · JavaScript · Git · GitHub

- Designed a developer portfolio to showcase software projects and technical capabilities.
- Created programming tutorials and practical project demonstrations while applying version-control workflows.

EDUCATION

M.Sc. Electrical Engineering — Power & Machines

University of Baghdad · 2017

B.Sc. Electrical Engineering

Al-Mustansiriyah University · 2010

CERTIFICATIONS

- Project Management Professional (PMP) — PMI · 2025
- Fundamentals of Programming & Problem Solving
- IELTS · 2019

TELECOMMUNICATIONS EXPERIENCE

Telecommunications / Network Engineer

Ericsson · 2010–2019

- Supported telecommunications infrastructure and network operations in a large-scale technology environment.
- Troubleshot technical issues affecting telecommunications systems and network services.
- Monitored and analyzed system conditions to identify operational problems and support service continuity.
